## Stacey Dooley: Ready for War?

**NEW FACTUAL** 9PM, BBC3

Stacey brings home the reality of war in Ukraine in her latest documentary, in which she follows a group of Ukrainian civilians as they undergo combat training with the British Army to prepare for battle. But although the five-week course is intense, involving exercises focusing on trench

warfare and hand-to-hand-combat, the film doesn't focus on that. It's really about the ordinary men – jewellers, florists and welders – who have no experience of war, but are willing to risk their lives on the frontline for their country. An emotional yet uplifting watch. ★★★★★ HD
